## Biking for breast cancer

DIAGNOSED with breast cancer, **Donna Handley** needed a challenge and learning to ride a motorcycle was it. On October 13 she'll be part of Amazon Heart Thunder - all women participating are survivors - revving up her Harley-Davidson and heading to Brisbane. Every day 32 women have their lives thrown into havoc and this journey is an opportunity to raise funds and awareness and to tell the story. Harley-Davidson has provided 20 new "hogs" plus jackets

for first-time riders. **Meredith Campbell** on 0412 653 202 can tell you more. Handley has completed five rides with Amazon Heart, taking her to the UK and the US, and she's just returned from helping build a cultural study centre for children of the Blackfoot tribe in Montana.
